	GEI Energy Round-Up					
	This week's Energy Round-Up focuses on America's need for a balanced and diverse set of					
	resources to power our electricity grid. The new study by analytics firm IHS Markit, co-sponsored					
	by the Global Energy Institute, puts a price tag on just how important our current balance of coal,					
	natural gas, nuclear and renewable energy really is to job growth, economic development and our security.

From Our Blog:	
Heath Knakmuhs writes there's a price to be paid for less reliable electricity. Without a divenergy mix, higher electricity prices would ripple through the economy meaning American have to pay more for the products we purchase, the food we consume and the services was To learn more click below.	s would
